Scale 1:500

The intended plot size of this plan is 914 mm in width by 610 mm in height when plotted at a scale of 1:500

**LEGEND:**

Bearings are grid bearings, derived from carrier phase GPS observations and are referred to the central meridian of UTM Zone 9 (129° West). To obtain local astronomic bearings referred to the meridian through Post R2, subtract 0° 28' 42" from the grid bearings.

This plan shows horizontal ground-level distances. To compute grid distances, multiply ground-level distances by the average combined factor of 0.999614. The average combined factor is based on an ellipsoidal elevation of 20 metres.

The UTM coordinates and estimated horizontal positional accuracy achieved are derived from dual frequency GPS ties to Geodetic Control Monument 722959. The estimated horizontal positional accuracy is 0.05 metres.
